

ORDER no. 34 from May 31st, 2013 (*updated*)

regarding the approval of the Regulation for granting establishment authorization and licenses in the natural gas sector

ISSUER: THE ROMANIAN ENERGY REGULATORY AUTHORITY

PUBLISHED IN: THE OFFICIAL GAZETTE no. 427 from July 15th, 2013

Effective date: July 15th, 2013

Updated form available on: **November 21st, 2016**

The current updated form is available from **October 24th, 2014** until **selected date**

According to the dispositions of art. 118, 139 and 152 from the [Law on electricity and natural gas no. 123/2012](#),

under the provisions of [art. 10 para. \(1\) c\) and d\) from the Government Emergency Ordinance no. 33/2007](#) regarding the organization and functioning of the Romanian Energy Regulatory Authority, approved with amendments and completions by the [Law no. 160/2012](#),

the Chairman of the Romanian Energy Regulatory Authority issues the following order.

ART. 1

The Regulation, provided in the annex of this current order, for granting establishment authorizations and licenses in the natural gas sector is approved.

ART. 2

The undertakings that request from Romanian Energy Regulatory Authority (ANRE) the granting, amending or withdrawal of the establishment authorizations and licenses in the natural gas sector will carry out the provisions of this Order, and organizational entities within ANRE will track compliance.

ART. 3

This order is published in the Official Gazette of Romania, Part I.

The Chairman of the Romanian Energy Regulatory Authority,
Niculae Havrileț

Bucharest, May 31st, 2013.

No. 34.

ANNEX

REGULATION
for granting of establishment authorizations
and licenses in the natural gas sector

CAP. I

General dispositions

ART. 1

(1) This regulation is issued in accordance with [art. 10 para. \(1\) c\) from the Government Emergency Ordinance no. 33/2007](#) regarding the organization and functionality of the Romanian Energy Regulatory Authority, approved with amendments and completions by the [Law no. 160/2012](#).

(2) The Romanian Energy Regulatory Authority, hereinafter ANRE, has the power, as the competent authority to grant, modify, suspend or withdraw authorizations for establishment and licenses referred to in art. 6 and 7 under the [Law of electricity and natural gas no. 123/2012](#) and the current Regulation.

Application domain

ART. 2

This Regulation shall apply to:

- a) ANRE, for the fulfillment of its duties specified in Art. 1 para. (2);
- b) undertakings requesting ANRE granting, amendment or withdrawal of establishment authorizations and licenses referred to in art. 6 and 7.

ART. 3

This Regulation shall not apply to undertakings requesting the granting, amending, suspension or revocation of permits to design and execution work in the natural gas sector.

ART. 4

The request to grant authorization for establishment and / or licenses is the responsibility of the undertakings that must act in this regard, according to this Regulation.

Definitions and Abbreviations

ART. 5

Terms used in this Regulation are defined in the [Law no. 123/2012](#); the list of abbreviations used is provided in annex no. 1.

CAP. II

Types of establishment authorizations and licenses in the natural gas sector

ART. 6

ANRE issues authorizations for establishment of new:

- a) upstream pipelines related to the production activity of natural gas;
- b) surfaced technological facilities of natural gas and storage in case of new deposits;
- c) installations for biogas / bio methane;
- d) natural gas transmission systems;
- e) natural gas distribution systems;
- f) facilities for liquefied natural gas (GNL);

g) installations of compressed natural gas (CNG) and compressed natural gas installations for vehicles (CNG / GNCV);

Lit. g) a art 6 a fost modificată de pct. 2 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, și de pct. 1 al art. I din același act normativ, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

- h) closed distribution systems;
- i) direct lines.

ART. 7

ANRE issues licenses in the natural gas sector for the activities of:

- a) providing of:
 - (i) natural gas;
 - (ii) biogas / bio methane;
 - (iii) GNL;
 - (iv) GNC/GNCV;

Pct. (iv), lit. a) a art 7 a fost modificat de pct. 1 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

- (V) liquefied petroleum gas (GPL);
- b) operation of:
 - (i) the transmission system;
 - (ii) the distribution system;
 - (iii) the storage system;
 - (iv) the upstream pipelines linked to production;
 - (v) the GNL terminal;
 - (vi) the closed distribution system;
 - (vii) repealed;

Pct. (vii), lit. b) a art 7 a fost abrogat de pct. 3 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014.

- c) management of centralized markets.

CAP. III

The authorization for establishment and licenses in the natural gas sector regime

SECTION 1

Procedures, terms and conditions for the granting of authorizations for establishment and licenses in the natural gas sector

ART. 8

- (1) To obtain an establishment authorization / license applicants submit to the premises of ANRE an application, according to the example in annex no. 2 accompanied by the documents referred to in this Regulation.
- (2) Applicants under para. (1) are Romanian or foreign undertakings.
- (3) A foreign undertaking may request the establishment authorization / license if it has established in Romania, under the law, a secondary office.
- (4) The application referred to in para. (1) accompanied by specific documents is submitted to ANRE.
- (5) Applicants involved in bankruptcy proceedings or applicants that have been withdrawn or suspended an authorization / a license for a period of 5 years prior to filing the application for reasons attributable to them cannot receive approval for an establishment authorization/license.

ART. 9

- (1) ANRE analyzes the submitted documentation in accordance with this Regulation and, if appropriate, sends the applicant a notice to be made aware of additions or clarifications to be made within a period not exceeding 30 days from the date of the registered request.
- (2) The period of analysis specified in par. (1) can be reduced to 10 days if the undertaking submits the required documents in electronic format to the specific requirements of this Regulation.
- (3) All information provided in electronic form shall be submitted on CD / DVD for each request for authorization for establishment / license.
- (4) The undertaking is required to complete documentation according to comments provided by ANRE, within 30 days of receiving the notification.
- (5) During the examination of the documentation, depending on the quality and completeness of the information, ANRE can decide:
 - a) the invitation at the ANRE premises, of the proxies of the applicant to clarify aspects of the documents submitted;
 - b) the verification and certification of documents through specific departments within ANRE, at the request of a general direction specialist;
 - c) the on the spot verification of the situation / existing documents by general direction specialist and, where appropriate, in collaboration with the general direction control; conclusions and / or findings of the discussions and / or verifications are recorded in a document signed by representatives of the applicant and ANRE.

SECTION 2

Documents common to all required authorizations for establishment and licenses in the natural gas sector

ART. 10

- (1) The application for an establishment authorization/license is accompanied by the following documents:

a) certificate issued by the Trade Register with no more than 30 days before the date of the application to ANRE, in original or certified copy, containing information identifying the undertaking's name, registered address, the unique registration number of the trade register, the state of the undertaking, type of organization, duration of formation, capital, associates/shareholders of the undertaking, the person / persons empowered to represent the undertaking, the activities of the undertaking that contain the activity which calls for the establishment authorization/license, branches/sub-units/subsidiaries, secondary offices/locations in Romania;

b) copies of identity documents and curriculum vitae of the legal representative/manager/CEO - experience of minimum 2 years in management activities, and for the technical manager of the management team - experience of minimum 5 years in management / coordination of activities specific to the natural gas sector; requirement of technical manager of the management team applies only to the activities specified in Art. 7 b).

(2) foreign undertakings submit the supporting documents issued by the competent authorities of the country of origin, corresponding to the requirements specified in para. (1), with a certified translation.

(3) If an undertaking requests more authorizations for establishment/licenses, joint documents mentioned in par. (1) shall be filed in one copy.

(4) If an authorization for establishment/license is requested by an undertaking authorized/licensed by ANRE, it may request, in writing, the use of the common documents mentioned in para. (1) already submitted, subject to supplement, if any amendments/updates of documents are necessary, and writing an affidavit stating that the documents in question are valid.

SECTION 3

Specific documents required for all types of establishment authorizations and licenses in the natural gas sector

ART. 11

(1) At the request of the authorization for establishment of upstream pipes associated to the natural gas production, in the case of new perimeters, or authorization to establish above ground technological facilities related to the storage activity of natural gas, in case of new deposits, common documents referred to in art. 10 are accompanied by the following specific documents:

a) copy of the petroleum agreement concluded under the legislation's specific incidents;

b) technological scheme contained in the technical/expert report/technical project of the objectives for which the authorization for establishment is requested;

c) the overall plan containing targets for requesting the establishment authorization contained in the technical/expert report/technical project, outlining the administrative limits of the municipalities on whose territory they are placed;

d) copy of the technical notice for connecting to the system / objective at which the connection is being made; provisions of technical documentation/ expert report/technical project to achieve the objective must be consistent with the requirements of the technical connection notice;

e) affidavit in original of the legal representative/general director/administrator of the undertaking, according to the example in the annex no. 3;

f) information on the technical characteristics of the objective for which the authorization for establishment is sought as set out in annex no. 4; detailed data is presented in electronic format for each objective, the XML file format, according to the schedule provided by ANRE;

g) copy of the building permit, within the validity period issued with specific incidents as required by law.

(2) At the request of granting the authorization for establishment of the natural gas transmission system, the common documents referred to in art. 10 accompanied by the following specific documents:

a) copy of the concession contract concluded under specific legal provisions incidents;

b) copy of the technical assistance contract for execution monitoring, reception and commissioning of the system, concluded with a licensee for transport, which has a similar experience of minimum 3 years if undertakings that do not possess a license for natural gas transportation;

c) technological scheme contained in the technical documentation/expert report/ technical project of the objectives for which the authorization for establishment is requested;

d) the overall plan containing targets for requesting the establishment authorization contained in the technical/expert report/technical project, outlining the administrative limits of the municipalities on whose territory they are placed;

e) affidavit in original of the legal representative/general director/administrator of the undertaking, according to the example in the annex no. 3;

f) information on the technical characteristics of the objective for which the authorization for establishment is sought as set out in annex no. 4; detailed data is presented in electronic format for each objective, the XML file format, according to the schedule provided by ANRE;

g) copy of the building permit, within the validity period issued with specific incidents as required by law.

(3) At the request of granting the authorization for establishment of a distribution system, of a closed distribution system or the direct line of natural gas, the joint documents referred to in art. 10 are accompanied by the following specific documents:

a) copy of the concession contract of service of natural gas distribution or, where appropriate, of the general approval issued by the technical commission for approval of feasibility studies prepared in order to lease the service of natural gas distribution and issuance of permits in accordance for undertakings in the natural gas sector, approved by order of the Chairman of ANRE;

b) copy of the technical assistance contract for execution monitoring, reception and commissioning of the system, concluded with a licensee for transport, which has a similar experience of minimum 3 years if undertakings that do not possess a license for natural gas transportation;

c) technological scheme contained in the technical documentation/expert report/ technical project of the objectives for which the authorization for establishment is requested;

d) the overall plan containing targets for requesting the establishment authorization contained in the technical/expert report/technical project, outlining the administrative limits of the municipalities on whose territory they are placed;

- e) copy of the technical connection to the upstream system, at which the connection is being made; provisions of technical documentation/ expert report/technical project to achieve the objective must be consistent with the requirements of the technical connection notice;
- f) affidavit in original of the legal representative/general director/administrator of the undertaking, according to the example in the annex no. 3;
- g) information on the technical characteristics of the objective for which the authorization for establishment is sought as set out in annex no. 4; detailed data is presented in electronic format for each objective, the XML file format, according to the schedule provided by ANRE;
- h) copy of the building permit, within the validity period issued with specific incidents as required by law.

(4) At the request for granting the authorization for establishment of biogas / bio methane or LNG, CNG / GNCV installations, the common documents referred to in art. 10 are accompanied by the following specific document:

Partea introductivă a alin. (4) al art 11 a fost modificată de pct. 1 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

- a) technological scheme contained in the technical/expert report/technical project of the objectives for which the authorization for establishment is requested;
- b) the overall plan containing targets for requesting the establishment authorization contained in the technical/expert report/technical project, outlining the administrative limits of the municipalities on whose territory they are placed;
- c) copy of the technical notice for connecting to the system / objective at which the connection is being made; provisions of technical documentation/ expert report/technical project to achieve the objective must be consistent with the requirements of the technical connection notice;
- d) affidavit in original of the legal representative/general director/administrator of the undertaking, according to the example in the annex no. 3;
- e) information on the technical characteristics of the objective for which the authorization for establishment is sought as set out in annex no. 4; detailed data is presented in electronic format for each objective, the XML file format, according to the schedule provided by ANRE;
- f) copy of the building permit, within the validity period issued with specific incidents as required by law.

ART. 12

(1) At the request for granting the license to supply natural gas, biogas / bio methane, LNG, CNG / GNCV, LPG, the common documents referred to in art. 10 are accompanied by the following specific documents:

Partea introductivă a alin. (1) al art 12 a fost modificată de pct. 1 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

a) copy of the rules of organization and functioning of the undertaking, wholly or in extract showing that at least the following activities are included:

(i) the duties and responsibilities of the departments engaged in activities related to natural gas, biogas/biomethane, GNL, GNC/GNCV, GPL;

Pct. (i), lit. a), alin. (1) al art 12 a fost modificat de pct. 1 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

- (ii) the existence of a system for communicating with clients;
- (iii) the existence of a collecting and problem solving system for clients' notifications;
- b) documents showing the financial resources of the applicant, ie equity, availability of lines of credit or loan agreements with banks, contract loans from shareholders / associates or any other form may include, without limitation, a letter of patronage committal issued a company of the same group of companies or businesses associated / affiliated companies of the applicant or oil agreements signed with the Romanian state for the activity of natural gas supply for:
 - (i) at least three months at the estimated average deliveries to be made in the license is sought for supplying natural gas, if the company is on the first application for a license;
 - (ii) at least two months of average deliveries in the last year of activity, where the company owns/owned a natural gas supplying license;
- c) affidavit in original of the legal representative/general director/administrator of the undertaking regarding the estimated quantity to be supplied in the year that the license is requested;
- d) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application.

(2) At the request of granting the operating license of the system for underground gas storage, the common documents referred to in art. 10 are accompanied by the following specific documents:

- a) copy of the rules of organization and functioning of the undertaking, wholly or in extract or its own rules to ensure the maintenance, showing that are included at least the following activities:
 - (i) detection of gas losses;
 - (ii) notices, complaints and interventions;
 - (iii) verifications and revisions of the surface technological installations related to the storage;
 - (iv) access to the system;
 - (v) checking documentation and / or technical projects, tracking work, performing receptions and commissioning works.

b) curriculum vitae of the persons responsible for coordinating the activities of a) showing the professional experience of minimum 3 years in that activity and that they have licensed plumber quality of IT degree

c) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application;

d) original affidavit of the legal representative / manager / director general of the undertaking on the elements of technical and economic objectives for which the license is requested as set out in annex no. 7; the data will be also detailed and be presented in electronic format in XML file format according to the schedule provided by ANRE;

e) copy of the decision appointing the reception committee at work termination according to specific incidents constituted under law, in electronic format;

f) copy of the forms from completion of the purpose for which the license is requested, signed by the committee specified in subparagraph e) in electronic format;

g) information in the national coordinate stereographic of 1970 covering every pipe, connection or station in the technical project located after the tap located at the exit of conditioning or, in its absence, after the point where the natural gas satisfy the technical requirements of quality to be sold, with the attached data as attributes:

1. the type of objective - pipe connection;
2. material;
3. nominal diameter;
4. length;
5. the type of substation - drying, measurement, adjustment / measurement, compression;
6. maximum designed capacity;
7. the number of forms of technical acceptance, on completion;
8. number of inventory; is transmitted to ANRE for completion within 3 months of commissioning the objectives.
9. book value - lei.

(The information is presented in GIS vector format on CD / DVD in XML files under a scheme provided by ANRE.)

h) copy of the environmental authorization for the purposes for which the license is requested, in electronic format;

i) copy of the risk assessment carried out in accordance with the legal provisions specific incidents;

j) copy of the metrological authorization from metrology laboratories belonging to the undertaking or from the contract for services concluded with a company that has such labs and copy of their authorization, in electronic format.

(3) At the request of granting the operating license of natural gas transmission systems, the common documents referred to in art. 10 are accompanied by the following specific documents:

a) copy of the rules of organization and functioning of the undertaking, wholly or in extract or its own rules to ensure the maintenance, showing that are included at least the following activities:

- (i) detection of gas losses;
- (ii) notices, complaints and interventions;
- (iii) verifications and revisions of the transmission system;
- (iv) access and connection to the system;
- (v) checking documentation and / or technical projects, tracking work, performing receptions and commissioning works;

b) curriculum vitae of the persons responsible for coordinating the activities of a) showing the professional experience of minimum 3 years in that activity and that they have licensed plumber quality of IT degree;

c) original affidavit of the legal representative / manager / director general of the undertaking regarding the estimate quantity for transportation in the year of the request of granting of the license;

d) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application;

e) original affidavit of the legal representative / manager / director general of the undertaking on the elements of technical and economic objectives for which the license is requested as set out in annex no. 7; the data will be also detailed and be presented in electronic format in XML file format according to the schedule provided by ANRE;

f) copy of the decision appointing the reception committee at work termination according to specific incidents constituted under law, in electronic format;

g) copy of the forms from completion of the purpose for which the license is requested, signed by the committee specified in subparagraph f) in electronic format;

h) information in the national coordinate stereographic of 1970 covering every pipe, connection or station in the technical project located after the tap located at the exit of conditioning or, in its absence, after the point where the natural gas satisfy the technical requirements of quality to be sold, with the attached data as attributes:

1. the type of objective - pipe connection;
2. material;
3. nominal diameter;
4. length;
5. the type of substation - drying, measurement, adjustment / measurement, compression;
6. maximum designed capacity;
7. the number of forms of technical acceptance, on completion;

8. number of inventory; is transmitted to ANRE for completion within 3 months of commissioning the objectives.

9. book value - lei.

(The information is presented in GIS vector format on CD / DVD in XML files under a scheme provided by ANRE.)

i) copy of the environmental authorization for the purposes for which the license is requested, in electronic format;

j) copy of the metrological authorization from metrology laboratories belonging to the undertaking or from the contract for services concluded with a company that has such labs and copy of their authorization, in electronic format.

(4) At the request of granting the operating license of the distribution system or closed distribution system the common documents referred to in art. 10 are accompanied by the following specific documents:

Partea introductivă a alin. (4) al art 12 a fost modificată de pct. 4 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014.

a) copy of the rules of organization and functioning of the undertaking, wholly or in extract or its own rules to ensure the maintenance, showing that are included at least the following activities:

(i) detection of gas losses;

(ii) notices, complaints and interventions;

(iii) verifications and revisions of the distribution system;

(iv) access and connection to the system;

(v) checking documentation and/or technical projects, tracking work, performing receptions and commissioning works;

(vi) the provision of records of verifications and revisions of the installations for usage;

b) curriculum vitae of the persons responsible for coordinating the activities of a) showing the professional experience of minimum 3 years in that activity and that they have licensed plumber quality of ID degree;

c) original affidavit of the legal representative/manager/general director of the undertaking regarding the estimate quantity for distribution in the year of the request of granting of the license;

d) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application;

e) original affidavit of the legal representative / manager / director general of the undertaking on the elements of technical and economic objectives for which the license is requested as set out in annex no. 7; the tables will be presented also in electronic format in XML file format according to the schedule provided by ANRE;

f) copy of the decision appointing the reception committee at work termination according to specific incidents constituted under law, in electronic format;

g) copy of the forms from completion of the purpose for which the license is requested, signed by the committee specified in subparagraph f) in electronic format;

h) information in the national coordinate stereographic of 1970, consistent with the hydraulic calculation scheme, including graphics of each pipe or fitting station in the technical project with the attached data as attributes:

1. location (county, city, street);

2. No. real estate - for the branch;

3. objective type - pipe branching;

4. material - PE80, PE100, OL;

5. diameter - outside for PE, nominal for OL;

6. pressure regime - ÎP, MP, RP, JP;

7. length;

8. station type - SR, SM, SRS, SRM;

9. maximum design capacity of the plant;

10. The number of forms of technical acceptance on completion;

11. The number of inventory; is transmitted to ANRE for completion within three months from the date of commissioning of the objectives;

12. Book value - lei.

(The information is presented in GIS vector format on CD / DVD in XML files under a scheme provided by ANRE.)

i) copy of the metrological authorization from metrology laboratories belonging to the undertaking or from the contract for services concluded with a company that has such labs and copy of their authorization, in electronic format.

(5) At the request of granting the operating license of related upstream pipelines for the natural gas production, the common documents referred to in art. 10 are accompanied by the following specific documents:

a) a) copy of the rules of organization and functioning of the undertaking, wholly or in extract or its own rules to ensure the maintenance, showing that are included at least the following activities:

(i) detection of gas losses;

(ii) notices, complaints and interventions;

(iii) access and connection to the system;

(iv) checking documentation and/or technical projects, tracking work, performing receptions and commissioning works;

(v) provision of records for the verifications and revisions of the utilization installations connected directly to upstream pipelines;

b) curriculum vitae of the persons responsible for coordinating the activities of a) showing the professional experience of minimum 3 years in that activity and that they have licensed plumber quality of IT degree;

c) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application;

d) original affidavit of the legal representative / manager / director general of the undertaking on the elements of technical and economic objectives for which the license is requested as set out in annex no. 7; the tables will be presented also in electronic format in XML file format according to the schedule provided by ANRE;

e) copy of the decision appointing the reception committee at work termination according to specific incidents constituted under law, in electronic format;

f) copy of the forms from completion of the purpose for which the license is requested, signed by the committee specified in subparagraph e) in electronic format;

g) information in the national coordinate stereographic of 1970 covering every pipe, connection or station in the technical project located after the tap located at the exit of conditioning or, in its absence, after the point where the natural gas satisfy the technical requirements of quality to be sold, with the attached data as attributes:

1. the type of objective - pipe connection;
2. material;
3. nominal diameter;
4. length;
5. the type of substation - drying, measurement, adjustment/measurement, compression;
6. maximum designed capacity;
7. the number of forms of technical acceptance, on completion;
8. number of inventory; is transmitted to ANRE for completion within 3 months of commissioning the objectives.;
9. book value - lei.

(The information is presented in GIS vector format on CD / DVD in XML files under a scheme provided by ANRE.)

h) copy of the environmental authorization for the purposes for which the license is requested, in electronic format;

i) i) copy of the metrological authorization from metrology laboratories belonging to the undertaking or from the contract for services concluded with a company that has such labs and copy of their authorization, in electronic format.

(6) At the request of granting the operating license of GNL terminals, common documents referred to in art. 10 are accompanied by the following specific documents:

a) copy of the rules of organization and functioning of the undertaking, wholly or in extract or after their own rules to ensure the maintenance of showing that at least the following activities are included:

- (i) detection of gas losses;
- (ii) notices, complaints and interventions;
- (iii) verifications and revisions of surface technological installations related to the GNL terminals;
- (iv) access to the system;
- (v) verification of documentation and / or technical projects, tracking work, performing receptions and commissioning works;

b) curriculum vitae of the persons responsible for coordinating the activities of a) showing the professional experience of minimum 3 years in that activity and that they have licensed plumber quality of IT degree;

c) copy of the document issued by a RENAR accredited organization or other similar international certifying organization, with a certified existence of an implemented integrated management system for quality-environment-health and safety at work; the undertaking the is on the first application for license presents a copy of the contract with by a RENAR accredited organization or other similar international organization on the initiation of the certification integrated management system for quality-environment-health and safety at work, showing progress in its process of implementation of the undertaking with completion within two years of the application;

d) original affidavit of the legal representative / manager / director general of the undertaking on the elements of technical and economic objectives for which the license is requested as set out in annex no. 7; Tables will be presented in XML file format according to the schedule provided by ANRE;

e) copy of the decision appointing the reception committee at work termination according to specific incidents constituted under law, amended and supplemented, in electronic format;

f) copy of the forms from completion of the purpose for which the license is requested, signed by the committee specified in subparagraph e) in electronic format;

g) information in the national coordinate stereographic of 1970 covering every pipe, connection or station in the technical project located after the tap located at the exit of conditioning or, in its absence, after the point where the natural gas satisfy the technical requirements of quality to be sold, with the attached data as attributes:

1. the type of objective - pipe connection;
2. material;
3. nominal diameter;
4. length;
5. the type of substation - drying, measurement, adjustment / measurement, compression;
6. maximum designed capacity;
7. the number of forms of technical acceptance, on completion;
8. number of inventory; is transmitted to ANRE for completion within 3 months of commissioning the objectives.
9. book value - lei.

(The information is presented in GIS vector format on CD / DVD in XML files under a scheme provided by ANRE.)

h) copy of the environmental authorization for the purposes for which the license is requested, in electronic format;

i) copy of the metrological authorization from metrology laboratories belonging to the undertaking or from the contract for services concluded with a company that has such labs and copy of their authorization, in electronic format.

(7) At the request for the grant of the license of market management centralized, the shared documents referred to in art. 10 accompanied by the following specific documents:

a) copy of the rules of organization and functioning of the undertaking, wholly or extracted, resulting in:

1. duties and responsibilities of departments engaged in the activities related to the administration of centralized markets of natural gas;

2. the existence of a system for communication with customers;

3. the existence of a system of submission of clarifications and resolving customer complaints;

b) documents showing the applicant's financial resources or equity, the availability of lines of credit or bank loan agreements, at least 1,000,000 euros at the exchange rate of the National Bank of Romania, valid at the registration date of the application for a license;

c) document which presents the description of the centralized natural gas markets which the applicant intends to manage under license;

d) the list of the main software products that are operated by the current applicant undertaking, for administering the centralized markets of natural gas referred to in subparagraph c) with details on use rights to such software;

e) trading rules for products covered by the application;

f) copy of the document issued by an organization accredited by RENAR or other similar international organization, certifying a system implemented by quality management and information security; the undertaking that is on the first application for license presents a copy of the contract with the certification by an accredited organization by RENAR or another similar international organization on the initiation of the certification of the quality management system and information security, showing the running of its implementation with completion within 2 years from the date of application.

SECTION 4

Validity periods for establishment authorizations and licenses in the natural gas sector

ART. 13

(1) After verifying the documents submitted, ANRE shall prepare a report proposing the approval / rejection of the request for granting / amendment of the establishment authorization / license.

(2) In the report for granting the duration of the proposed establishment authorization / license is specified, as follows:

a) the establishment authorizations referred to in art. 6 or licenses in art. 7 b) sections. (i) - (iv) the validity period is correlated with the duration stipulated in the contract under which it operates, namely:

(i) the concession contract or partnership agreement concluded with the local authority; the validity period is extended for the duration of the works is modified by amendments to these contracts;

(ii) the petroleum agreement concluded under the legislation's specific incidents;

b) the licenses provided in art. 7 a) and b) pts. (v) - (vii) and c) are valid for a maximum period of 25 years.

(3) The report referred to in para. (1) shall be submitted for approval or rejection, to the Regulatory Committee.

ART. 14

(1) The owner of the establishment authorization / license has the right to request an extension of its validity before the expiration date; in this case the applicant must take into account the duration of the analysis of the request by ANRE, and the schedule of meetings of the Regulatory Committee so as to ensure the continued validity of the establishment authorization / license.

(2) For the purposes of the para. (1), the holder shall submit an application to ANRE accompanied by:

a) an ascertain certificate specified in art. 10 para. (1) a);

b) a copy of the document proving that the fee for the renewal of the authorization for establishment / license under the tariffs approved by ANRE.

SECTION 5

The approval of request for granting authorizations for establishment and licenses in the natural gas sector

ART. 15

(1) The Regulatory Committee of ANRE makes a reasoned decision granting, amendment or rejecting the request for authorization for establishment / license within up to 30 days from the application date by the applicant, except as provided in Art. 24 para. (3).

Alin. (1) al art 15 a fost modificat de pct. 5 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat in MONITORUL OFICIAL nr. 774 din 24 octombrie 2014.

(2) The granting, amendment or rejection of the request for authorization for establishment / license is made by decision of ANRE.

ART. 16

(1) When ANRE withdraws an undertaking's license for the distribution of natural gas, ANRE has the right to nominate another undertaking, holder of similar licenses to carry a maximum of two years of work, taking into account :

a) the size of the distribution systems in question;

b) the distance from neighboring distribution systems that can take over the job;

c) the capability of the undertaking designated to take over and operate.

(2) In the situation described in par. (1) ANRE shall issue an operating license distribution system for the undertaking appointed to the validity period specified in par. (1) accompanied by specific conditions of validity.

ART. 17

If the concession or petroleum agreement under which an activity is pursued in the gas sector was transferred to another undertaking, ANRE shall grant or amend the authorization for establishment / appropriate license to the new owner, based on his application, accompanied the common documents referred to in art. 10.

ART. 18

The conditions of validity corresponding to the authorizations for establishment / licenses contain, where appropriate, the following main provisions:

- a) the rights under the establishment authorization / license;
- b) conditions, limitations and restrictions on continuity and authorized objectives of the operational regime;
- c) the technical data concerning the authorized purpose;
- d) the obligation of authorizations for establishment / licenses holders to provide information to ANRE, regarding their activities in natural gas sector, using data type, frequency, format data transmission and the like, specified by ANRE and / or regulations in force.

ART. 19

- (1) The authorizations for establishment and licenses are registered by the General Directorate of the ANRE in an electronic register, and the registration is done in order of their issue.
- (2) The establishment authorization / license number is the serial number in the register.
- (3) The authorization for establishment / license is presented in annex no. 8.

ART. 20

The authorization for establishment/ license is issued in one copy being sent by ANRE to the holder and a copy is attached to the report provided for in art. 13 para. (1).

ART. 21

(1) ANRE decisions for granting or amending permits for establishment / licenses are published on the expense of the Official Gazette of Romania, Part IV, and the suspension / withdrawal and rejection ANRE on public expense.

Alin. (1) al art. 21 a fost modificat de RECTIFICAREA din 31 mai 2013, publicată în MONITORUL OFICIAL nr. 572 din 9 septembrie 2013, prin înlocuirea sintagmei "... Monitorul Oficial al României, Partea I..." cu sintagma "... Monitorul Oficial al României, Partea a IV-a...".

(2) The information on the granting, dismissing, suspending or withdrawing authorizations for establishment / licenses decisions are published on the website of the institution.

(3) The decisions to grant, reject, suspend or revoke authorizations for establishment / licenses shall be communicated in writing to the applicant within 15 calendar days from the date of approval.

(4) The ANRE decisions on granting / refusing to grant authorization for establishment / license can be appealed to the administrative court under the law.

CAP. IV

The procedure for amending licenses and authorizations for establishment the in natural gas sector

ART. 22

(1) On request or on its own initiative, ANRE may decide, in accordance with the legal provisions, the amendment of authorization for establishment / licenses issued under the following circumstances:

- a) it is necessary to update the technical parameters listed in the establishment authorization / license;
- b) in the case of changes to the statute of the establishment authorization /license holder by division, merger, transformation, change of name, headquarters, share capital or heritage;
- c) if some legislative changes or changes in circumstances occur after the date of issuing of the authorizations for establishment / licenses or events that substantially affect or render impossible the performance of activities authorized / licensed.

(2) In cases provided in par. (1) c) the amendment of the permits for establishment / licensing is made by the initiative of ANRE, with the equal treatment of holders and situation which led to the amendment; ANRE shall communicate the changes in writing to the establishment permit/license holders.

(3) In cases provided in par. (1) b) the establishing authorization/license holder requests amendment to ANRE within 30 days; After receiving the notification, ANRE shall examine the new situation created and has, if the request is founded, establishing appropriate permits / licenses amendments, permits or licenses releasing a modified content.

(4) If the order laid down in para. (1) b) cannot proceed in accordance with para. (3) the establishing authorization /license holder requests the transfer of the establishment authorization / license by ANRE to another undertaking; In this case, the undertaking to which the transfer must apply to ANRE for granting/amending the establishment authorization / license and submit to appropriate common documents referred to in art. 10.

ART. 23

(1) The holder of an authorization of establishment calls for its amendment as follows:

a) quarterly, if the objectives / systems are implemented on the basis of technical documentation / expert reports / technical projects that were not contained in the documentation on which the authorization was originally granted;

b) annually, in situations other than those referred to a) under the specific incident legislation .

(2) the period during which licensees for establishment calls updating technical characteristics mentioned in par. (1) b) established by ANRE by the conditions of the authorization for establishment, for each holder separately.

(3) the requests amending the establishment authorization must be correlated with the investment plan approved by ANRE; otherwise, the undertaking is obliged to provide explanations and justifications for the investment made outside the approved investment plan.

ART. 24

(1) The holder of a license requests an amendment as follows:

a) prior to commissioning objectives / systems, if they are placed in a location for which no specific license is granted;

b) annually, for the commissioning of new objectives placed in a location specific license is granted.

(2) The period during which licensees call for updating the technical characteristics mentioned in par. (1) b) is established by ANRE by the license conditions specific to each holder in hand.

(3) In cases provided in par. (1) b) a report is prepared by the specialized department within ANRE and shall require the approval of the Chairman, within up to 30 days from the application date by the applicant annexes to a changing it properly.

Alin. (3) al art 24 a fost introdus de pct. 6 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014.

ART. 25

(1) At the request to amend the license for establishment, the undertaking submits joint documents referred to in art. 10 and the following specific documents:

a) for the related upstream pipelines for natural gas production or for the above ground technological installations for stockpiling natural gas the documents referred to in art. 11 para. (1) b) -g), as applicable, are submitted;

b) for natural gas transmission systems the documents referred to in art. 11 para. (2) c) -g), as applicable, are submitted;

c) for distribution systems and enclosed distribution systems and gas artery the documents referred to in art. 11 para. (3) c) -h), as applicable, are submitted;

d) for biogas/bio methane installations or GNC/GNCV, GNL installations the documents referred to in art. 11 para. (4) are submitted.

Lit. d), alin. (1) al art 25 a fost modificată de pct. 1 al art. I din ORDINUL nr. 103 din 15 octombrie 2014, publicat în MONITORUL OFICIAL nr. 774 din 24 octombrie 2014, prin înlocuirea sintagmei "GNCV" cu "GNC/GNCV".

(2) If the petroleum agreement or concession contract changes, its owner has the obligation to notify this to ANRE within 48 hours.

(3) At the request for modification of a license, the undertaking submits joint documents referred to in art. 10 as well as specific documents referred to in art. 12.

CAP. V

The procedure for suspension and withdrawal of authorizations for establishment and licenses in the natural gas sector

ART. 26

(1) If the authorization holder of the establishment / license does not meet the specific validity conditions from imputable reasons acknowledged by ANRE, seized by third parties or notified by the owner, ANRE shall proceed as follows:

a) if the situation can be remedied, it shall provide a compliance deadline of maximum 3 months;

b) if the deadline specified in subparagraph a) the situation has not been remedied, the undertaking is sanctioned a contravention with a warning and, accordingly, suspended the establishment authorization / license in question for a period of maximum 3 months; where work is carried out under a concession contract, ANRE shall notify the grantor in this regard;

c) when at the expiration date of the suspension mentioned in b) the situation has not been remedied, the establishment authorization / license is withdrawn; where work is carried out under a concession contract, ANRE shall notify the grantor in this regard.

(2) failure or, where appropriate, improper fulfillment of specific conditions for validity reasons attributable to the holder, ANRE orders:

a) if the situation can be remedied, the undertaking is sanctioned with a contravention fine and, accordingly, granted a compliance period of maximum 3 months;

b) if the situation has not been remedied, the undertaking is sanctioned with a contravention fine and , accordingly, suspended the establishment authorization / license for a period of maximum 3 months; where work is carried out under a concession contract, ANRE shall notify the grantor in this regard;

c) if the situation has not been remedied after the expiry of the suspension, the establishment authorization / license is withdrawn; where work is carried out under a concession contract, ANRE shall notify the grantor in this regard.

(3) suspension or withdrawal of the establishment / license of the undertaking requires cessation according to ANRE decision from the date specified therein.

(4) In duly justified circumstances and without technical safety being jeopardized if the activity significantly affects the interests of consumers of natural gas, the grantor with ANRE have the following rights:

a) to permit the continuation of the license suspension period;

b) to extend the deadline monthly for compliance without suspending or withdrawing the establishment authorization / license under paragraph. (1) and (2); at the expiration date of every compliance, until the remedy of the situation, ANRE applies contraventions to the undertaking, if it's its fault;

c) if the establishment authorization / license is granted for more goals, it may be provided only partial suspension of activity for the targets and ordering compliance within a month;

ART. 27

ANRE withdraws the authorization of establishment / license in the following situations:

a) in cases specified in Art. 26;

b) in cases where bankruptcy proceedings have been opened;

c) at the request of the holder; where work is carried out under a concession agreement, partnership agreement with the local authority or petroleum agreement, ANRE has the right to withdraw the establishment authorization / license holder shall submit the agreement only after the partner contract.

CAP. VI

Transitional and final provisions

ART. 28

(1) For undertakings holders of operating authorizations/licenses issued by ANRE according to the Regulation for granting authorizations and licenses in the natural gas sector, approved by [Government Decision no. 784/2000](#), republished, as amended, ANRE re-issues new licenses within 9 months from the date of entry into force of this regulation without paying additional fees.

(2) (2) Upon the issuance of the licenses mentioned in par. (1) authorizations/licenses issued under the provisions of the regulation for granting authorizations and licenses in the natural gas sector, approved by [Government Decision no. 784/2000](#), republished, as amended, shall be terminated.

(3) ANRE is entitled to require the authorized/licensed undertakings information necessary for the application from par. (1).

(4) Notwithstanding the provisions of art. 10 and art. 12 para. (1) ANRE may approve the licensing of natural gas supply based on an agreement with the other competent authority of an EU Member State.

(5) Documents required to obtain a license to supply natural gas to be submitted by applicants at the ANRE premises and are provided in the agreement referred to in para. (4).

(6) The agreement referred to in para. (4) will be published in the Official Gazette of Romania, Part I.

ART. 29

(1) ANRE charge fees for:

a) analysis of the applications for granting/modification of authorizations for establishment/licenses in the natural gas sector;

b) granting/amending authorizations for establishment/licenses in the natural gas sector.

(2) The fees referred to par. (1) are approved by order of the Chairman of ANRE.

(3) In the submission of grant/modification of authorizations for establishment/licenses in the natural gas sector, the applicant shall submit a copy of the document proving the paid fee for documentation review, according to the fees approved by ANRE.

(4) In the granting/amending authorizations for establishment/licenses in the natural gas sector, the applicant shall pay the fee for granting/amending authorizations for establishment/licenses in the natural gas sector, according to the fees approved by order of the Chairman of ANRE.

(5) ANRE shall notify the applicant within 5 working days of the decision and its financial obligations under par. (4).

(6) Within 5 working days from the date of communication by ANRE notification on granting/amending the authorization for establishment/license and invoice issued, the applicant shall prove the payment of the according fee.

(7) The failure of proving the payment of the fee within the period specified in par. (6) may incur the refusal to issue the decision by ANRE.

ART. 30

ANRE charges annual contributions from licensees of natural gas, the duration of the license, including its suspension period, according to the level of contributions approved by order of the Chairman of ANRE.

ART. 31

ANRE publishes on the website of the institution's up to date information on granted / refused, suspended and / or withdrawn permits and licenses.

ART. 32

Annexes no. 1-8 are an integrating part of this Regulation.

ANNEX 1

of the Regulation

LIST of abbreviations

1. ANRE - Romanian Energy Regulatory Authority
2. ISO - International Standard Organization
3. ISC - State Construction Inspection
4. RENAR - Accreditation Association of Romania
5. PT - technical project
6. mc - cubic meter of natural gas
7. PM - measuring panel
8. PRM - adjustments-measuring station
9. PR - post adjustment
10. SCV - station control valves
11. SR - adjustment station
12. SM - measuring station
13. SRM - control-measuring station
14. SRS - sector adjustment station
15. OL - steel
16. PE - high density polyethylene
17. IP - high pressure
18. RP - low pressure
19. MP - average pressure
20. GIS - Geographic Information System
21. XML - Extensible Markup Language
22. CD - Compact Disc
23. DVD - digital versatile disc

ANNEX 2

of the Regulation

APPLICATION for authorization of establishment / license in natural gas

Registration number to ANRE/.....

The Romanian Energy Regulatory Authority (ANRE)
/(name of the undertaking), registered with the Trade Register under
 no. CUI, with headquarters in, str.
 no. ..., postal code, telephone, fax, e-mail
, website, with the legal representative
, according to the provisions of the [Law on electricity and natural gas no. 123/2012](#), request/(the grant of authorization / license or modification of
 authorization / license)*)

In support of the application we enclose the following documents folder:

-
-
-
-
-
-
-
-

Legal representative of the undertaking,

 (clear first and last name, signature and stamp)

*)Is filled with the type establishment authorization or license required under Regulation for granting authorizations and licenses for the establishment in natural gas sector, approved by [Order of the Chairman of The Romanian Energy Regulatory Authority no. 34/2013](#).

ANNEX 3

of the Regulation

AFFIDAVIT
 of the legal representative

The undersigned,, legal representative of the undertaking
, registered with the Trade Register under no. CUI
 knowing art. 292 of the Criminal Code regarding false statements, hereby declare the following:

- all copy documents are according to their originals;
- the technical documentation / expert reports / technical projects were prepared and verified by authorized undertakings, under specific legal provisions incidents;
- for the objectives / systems submitted for authorization for the establishment, our company has full economic and technical documentation drawn up by as required by applicable law, this can be made available to the Romanian Energy Regulatory Authority for consultation and / or verification;
- the present value of objectives / system for which authorization is sought to establish is lei (excluding VAT);
- the timing of execution of works related to the system for which authorization is requested:
